SUMMARY

Computer Science undergraduate with hands-on experience in designing and developing full-stack web applications using Java, JavaScript, React.js, Node.js, Express.js, MySQL, and MongoDB. Experienced in building responsive user interfaces, RESTful APIs, secure authentication systems, and database-driven applications through academic projects. Proficient with Git, GitHub, SQL, and modern development tools, with strong problem-solving, collaboration, and communication skills. Passionate about developing scalable software solutions and leveraging AI-assisted development tools to deliver high-quality applications in Agile environments.

EDUCATION

Canara Engineering College

Bachelor of Engineering in Computer Science

Government PU College

Pre-University Course (PCMB)

Mangalore, Karnataka

Sep 2023 – Present

Aversa, Ankola, Karnataka

Jun 2021 – May 2023

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Database: MySQL, MongoDB Atlas, SQL

Developer Tools: Git, GitHub, VS Code, Postman, Vercel, Render

Core Skills: Full Stack Development, Authentication, Database Design, API Integration, Responsive Web Design

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Time Management, Continuous Learning

PROJECTS

Smart Hostel Complaint Maintenance Tracker | *React.js, Node.js, Express.js, MySQL* *Aug 2025 – Nov 2025*

- Engineered a full-stack complaint management system using React.js, Node.js, and MySQL, enabling students to submit, monitor, and track maintenance requests through real-time status updates.
- Implemented secure OTP-based role authentication for Students, Wardens, and Chief Warden, automated complaint escalation after 3 days of inactivity, and integrated email notifications to improve administrative efficiency.
- Developed RESTful APIs, connected the React frontend with the Node.js backend and MySQL database, and generated downloadable CSV reports for streamlined complaint management and analysis.

Fitness Tracker Web Application | *React.js, Node.js, Express.js, MongoDB Atlas* *Jan 2026 – Jun 2026*

- Developed a responsive full-stack fitness application using React.js, Node.js, Express.js, and MongoDB Atlas with JWT-based authentication, enabling secure user registration, login, and workout management.
- Built interactive dashboard analytics using Chart.js to visualize workout history, calories burned, and exercise duration, and integrated Leaflet.js with OpenStreetMap APIs for location-based gym discovery.
- Designed scalable RESTful APIs, integrated MongoDB Atlas for persistent data storage, and deployed the production-ready application using Vercel and Render following modern full-stack deployment practices.

COURSES & CERTIFICATIONS

- Google AI Essentials (Coursera):** Learned AI fundamentals, prompt engineering, responsible AI practices, and productivity enhancement using AI-powered tools.
- RDBMS PostgreSQL Training (Spoken Tutorial, IIT Bombay):** Gained hands-on experience with SQL queries, relational database design, normalization, joins, constraints, and PostgreSQL database management.
- Python for Beginners: Mastering the Essentials (Scaler):** Strengthened programming fundamentals including data types, functions, loops, object-oriented programming basics, and problem-solving using Python.
- Cyber Job Simulation (Deloitte – Forage):** Completed practical tasks involving cybersecurity analysis, threat identification, risk assessment, and professional communication in a simulated enterprise environment.
